

An overview of Modern

Lizhong Zhang
Jan 31, 2018

What happened after 1998?

Ref: <http://www.modernesccpp.com/index.php/multithreading-in-modern-c>

Feature highlights

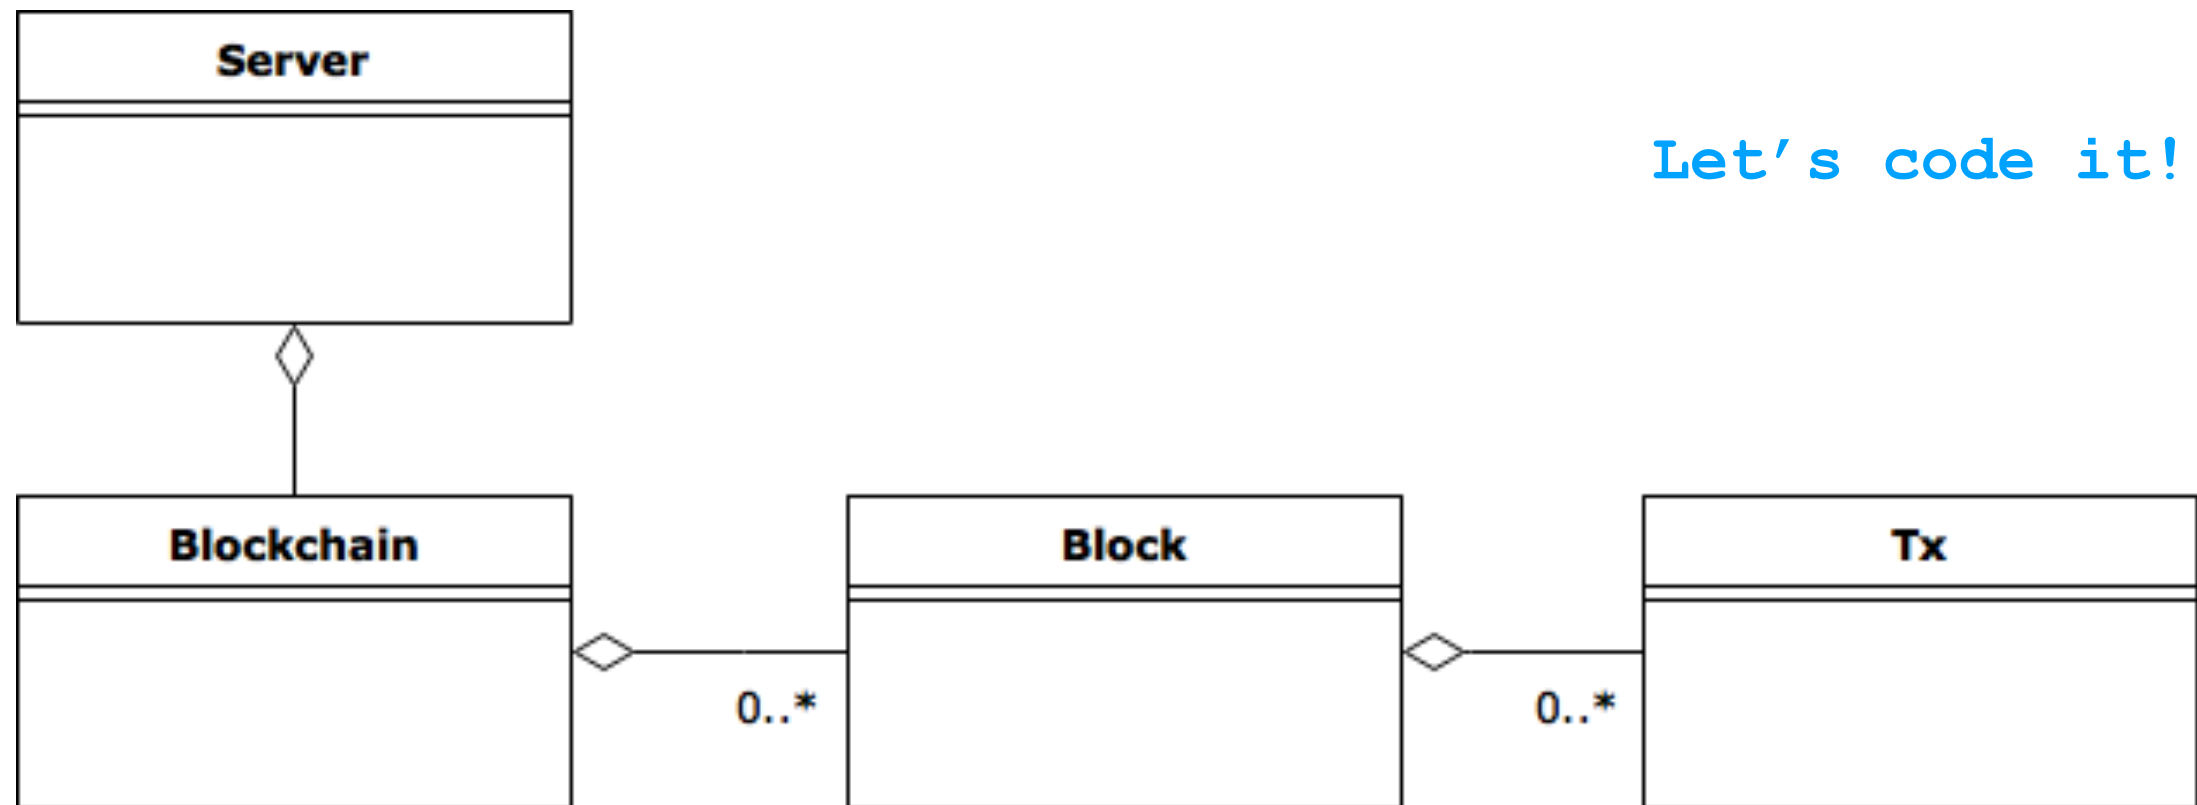

- `Type deduction`
- `Range-based for loop`
- `Uniform initialization`
- `Lambda`
- `Smart pointers`
- `Rvalue and move semantics`
- `Concurrency: multi-thread, parallel STL (C++17)`

**Less code,
better
performance**

What's blockchain?

Go to [demonstration!](#)

Build a simple blockchain using modern C++

How about the future?

C++20 is on the way

- Atomic smart pointers
- `std::future`
- Coroutines
- Task blocks
- ...

Useful resources

- Code repo and PPT: <https://github.com/lizhongz/link>
- Learn more: C++11/14/17 [Cheatsheet](#)
- Compiler: Clang
- IDE: CLion, Visual Studio

Thank you!
